

# Manual Handling Certification

Add recognition & quality to your certificates

Having successfully completed the City & Guilds Manual Handling 'Train the Trainer' qualification, it's now time to get the Proskills Global stamp of approval on your certificates.

There are two levels of certification available:

1.

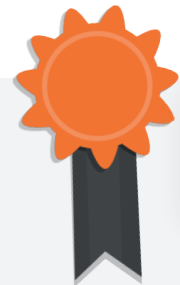

## Certificate of Training

Upon passing the nationally mapped test questions, your trainees will receive embossed certificates proving their completion of the training. We will take care of the administration and delivery of the certificates, alongside award winning customer service and ongoing support.

- > Audit\*
- > £15 (+VAT) per certificate

2.

## Certificate of Competence

Take your trainees to the next level with an additional practical demonstration of their trainee's skills. By proving their capability either at the end of the course or within the workplace, you will also be provided with a matrix which will allow the course to be used as a Recognised Prior Learning or Recognised Prior Certification for vocational qualifications in the workplace.

- > Audit\*
- > £30 (+VAT) per certificate

## Audit\*

---

We provide a fast and clear quality assurance scheme through our Audit process. All registered trainers must undergo this procedure to ensure the training delivered meets Proskills Global's high standards of excellence.

These are broken down into a half or one day Audit depending on your certificate choice and include results and feedback. Prices start at £375 (+VAT).

Our certificates are produced to a high quality standard and are issued under strict assurances.

## Nationally Mapped Questionnaire

---

National Occupational Standards (NOS) offer the building blocks of workplace competency and Proskills Global have mapped the Manual Handling test papers to NOS, ensuring your trainees are meeting the national standards.

## The National Stamp of Approval

---

Your certificates will be issued with the Proskills Global branding. These are nationally recognised and come with the reputation for excellence in training.
